

Alkyd acrylic copolymer lotion Better BWR-7010

Product Description:

BETTER BWR-7010 It is an alkyd acrylic acid copolymer lotion, which is specially used to seal the color bleeding and tannin on special wood. It can be used as a varnish or paint, and has a wide adaptability to additives and fillers. It can be formulated with conventional pigments, fillers, wetting agents, defoamers, and other components.

Product Features:

Excellent sealing tannin acidity

Good permeability and adhesion to substrate

Conventional fillers, wetting agents, defoamers, etc. can be used as components in the formula

Can be mixed with water-based alkyd for use

Single component system, can be used as varnish or color paint

For wood with serious color bleeding or oil bleeding, it is recommended to seal two layers with varnish or one layer with varnish, and use this lotion for white primer

Product specifications:

Appearance	Milky white lotion
Solid content, %	40 ± 1
PH	8.5 ± 1
Viscosity, MPa. s, 25 °C	<500
Volatile substances	Water
Minimum film-forming temperature, °C	19
Specific gravity, kg/L	1.04

应用范围:

封闭底漆, 封闭白底漆, 白底漆
喷涂, 淋涂, 浸涂

配方建议

为了室温环境下成膜更好, 在 Better BWR-7010 的配方中需要加入成膜助剂或增塑剂
推荐使用的成膜助剂
二丙二醇丁醚 (DPnB), 二丙二醇甲醚 (DPM) 等

包装规格及储存:

50, 120, 160kg/桶
阴凉通风处, 0 度以上, 原密封容器中, 保质期为 6 个月
